quantiphi
Solving What Matters
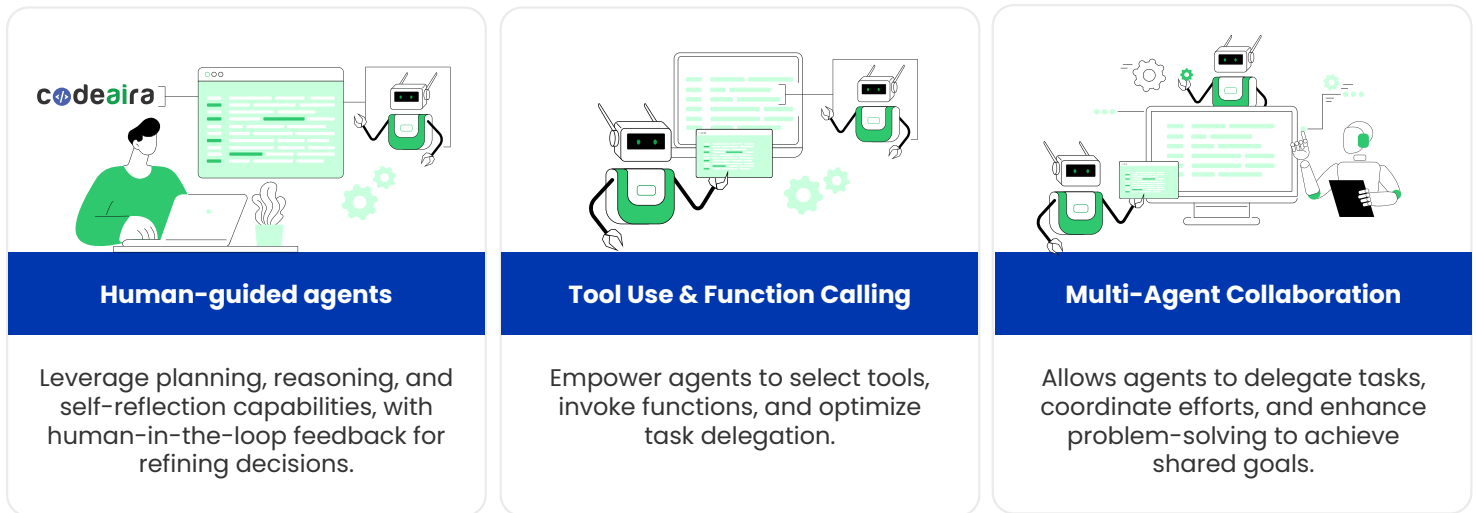

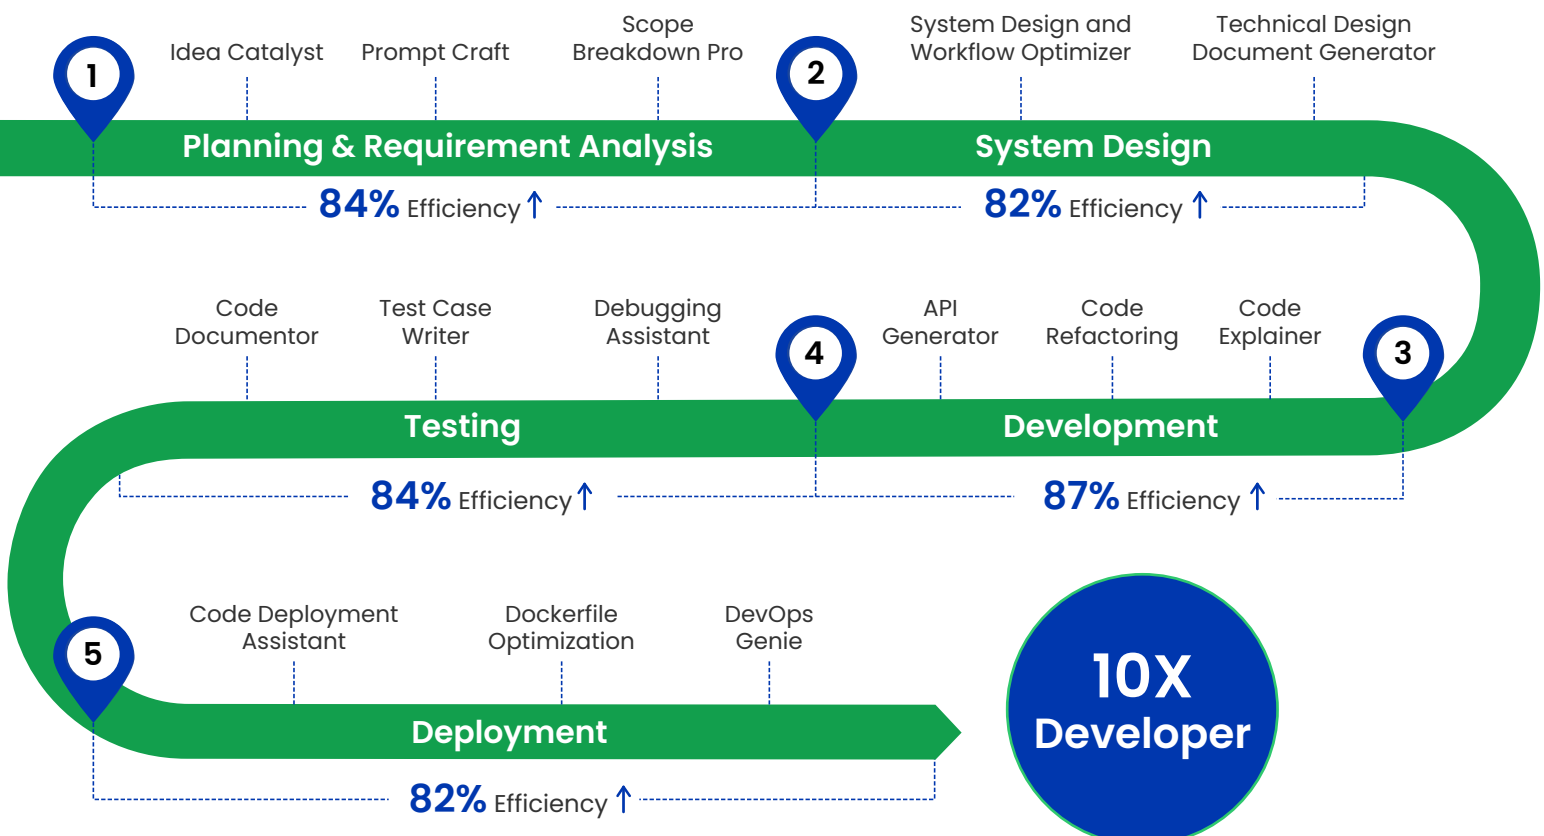

codeaira
AI-Powered Agent for Developers

Codeaira is Quantiphi's AI-powered agent designed to bring the myth of the 10X developer to life. With over 200 ready-to-use utilities, agentic workflows, and advanced code auto-complete feature, Codeaira accelerates development by seamlessly integrating with your preferred LLMs & IDEs.

Boost Developer's Productivity with Codeaira's Human Guided Agent

Human-guided agents
Leverage planning, reasoning, and self-reflection capabilities, with human-in-the-loop feedback for refining decisions.

Tool Use & Function Calling
Empower agents to select tools, invoke functions, and optimize task delegation.

Multi-Agent Collaboration
Allows agents to delegate tasks, coordinate efforts, and enhance problem-solving to achieve shared goals.

On a Journey to Make the Mythical 10X Developer Real, One SDLC Step at a Time

From ideation to deployment, Codeaira redefines every step of the SDLC, bringing the 10X developer vision into reality.

10X Developer

Real-Life Use Cases and Benefits with the 10X Developer in Action

Code Conversion & Translation

50% SQL Query Optimization

85% Snowflake SQL to BQ SQL

65% Code Explainer

90% Data Definition Language Conversion

40% HTML to FrontEnd Conversion

Code Review & Improvement

80% Code Commenter

70% Code Review Automation

60% Code Optimizer

85% Unit Test Case Generator

50% Code Debugger

Code Generation & Suggestion

50% Python Class Builder

80% Data Dictionary Creator

70% API Curator

70% ReactJS Redux Code Generator

70% Lang Chain Prompt Generator

DevOps Assistance

70% HELM mapping Corrector

75% CI/CD Code Generator

60% Docker File Optimizer

70% Docker File Evaluator

50% YAML File Generator

Innovate Securely: Your Data, Your Control

Flexible Deployment: Containerized & Private
Deploy securely within your infrastructure using containers, ensuringfull control over your data

Granular Control: RBAC & Audit Logs
Robust role-based access control and detailed audit logs provide comprehensive control and monitoring

Observability: Industry-Standard Logging & Monitoring
Ensure full visibility into system activity and potential security issues with industry-standard logging and monitoring

IP Ownership: Data In & Out Remains Yours
Retain complete ownership of all data input and output, ensuring your intellectual property remains secure

LLM Integration: Plug & Play with SOTA Models
Seamlessly integrate with leading LLMs, giving you the flexibility to choose the best model for your needs

Data Privacy: Your Data is Never Used for Training
Protect your intellectual property with pre-trained state of the art models that never use your data for training
